## Eloa

With a unique voice and sincere presence, this swiss artist explores the contrasts of human nature through her Folk Pop compositions. She shares her songs in an intimate acoustic setting — a musical delight served with a welcome touch of humor.

## The big leap with «Eloa»

In 2020, after 5 studio albums and over 200 concerts in Switzerland and abroad with her alternative Metal band «Mingmen», Elodie launched her solo project under the name Eloa.

"Ever since I was little, I always wanted to tell stories, express my emotions, compose my music, and find my own path. Through Eloa, I found the courage to embrace what I truly wanted to share."

She then recorded a first single titled "The Sun" at the Trois Lunes Studio in Montreux. The recording of the album «Cold Love and Firestone» is done in July 2025 at Blend Studio in Lutry.

## Two Guitars and a Year of Musical Journey

In 2025, after around more than fifty solo concerts, she is joined on stage by one of the guitarists from the band «Grand Canard Blanc».

Together, they decide to embark on an extraordinary adventure: traveling the world for a whole year to promote this debut album and play everywhere.

A journey full of surprises that will be shared authentically on their social media.
